

Client Name and Date of Birth _____

Screening Tools

Despite the high prevalence of mental health and substance use problems, too many Americans go without treatment — in part because their disorders go undiagnosed. Regular screenings in primary care and other healthcare settings enables earlier identification of mental health and substance use disorders, which translates into earlier care. Screenings should be provided to people of all ages, even the young and the elderly.

Please initial the screenings that interest you:

- _____ Depression http://www.hr.ucdavis.edu/asap/pdf_files/Beck_Depression_Inventory.pdf
- _____ Drug & Alcohol Use
- _____ Bipolar Disorder
- _____ Suicide Risk
- _____ Anxiety
- _____ Trauma
